looks great"

"Will certainly buy from
greatplatemate.com
again!"

"Excellent! lol...:0)"

The 'Great Plate Mate' Number Plate Surround

Small business or big business, you've got vehicles on the road that could be delivering your message and selling for you. Perhaps you don't want to cover your cars with expensive vinyl graphics. Maybe you don't want the hassle of taking it off and repairing the damage that can often occur.

The greatplatemate surround targets your advertising to anyone sitting in a car behind you. You can't help but read the message on a greatplatemate. Our product will increase your visibility at the fraction of the cost of regular advertising!

We customise your surround using your logo, or whatever you desire. We can match your website theme or your corporate colours – whatever your artwork, we can print it on a greatplatemate surround.

Our surround fits all 520mm standard width number plates and adjusts to fit plates of any height. Fitting is easy and there's **no need to buy new number plates!** Our frames are tough, can be moved from one vehicle to another and won't damage your paint.

We also offer a decal only service for existing customers so if you change your corporate image, just replace the existing decals with a new one – it's quick, inexpensive and easy!

So go on – drive your message home!
